

Dr. Yow Meeting Minutes
January 17, 2021 10:00 AM

Things Team SolarSize hopes to discuss:

- Touchbase
- Demo
- Feedback

Attendees:

- Tristan Brown-Hannibal
- Karlee Fidek
- Kaden Goski
- Dr. Kin-Choong Yow

Touchbase:

- Winter 2022 semester Gantt chart
 - Looks good
 - Seems reasonable plan wise
 - Keep in mind that we really only have 2 $\frac{3}{4}$ months for the project this semester as Project Day is early April
- Unfortunately, Dr. Yow will not be able to attend project bazaar days this semester due to schedule conflicts, so he will meet with outside of those times

Demo:

- API call froze
 - Potentially look into using store data for Project Day demo if API seems like it will potentially pose a problem timewise for the demo time limit
- Otherwise, looks good

General Feedback:

- Likes this project idea better than our first project idea
 - Feels this project is solving a real purpose and will be more useful in the end
