Greenwave Meeting Minutes
October 19, 2021 11:30 AM

Things Team SolarSize hopes to discuss:
- Technology stack
- Solar data
- Data access

Attendees:
- Tristan Brown-Hannibal
- Karlee Fidek
- Kaden Goski
- Liam Diebel
- Usman Munawar

Technology stack:
- PHP back-end
- Javascript front-end
- SQL Server database
- Data analytics lifecycle
- ML input for real-time data

Data:
- Will compile consumption data into .csv and send it to us
- Will be individual building level data
- Carlyle, SK will be main source of data

Solar data:
- Need to take into account where sun is at certain times of the day
- Need to utilize weather information and determine how Saskatchewan weather affects generation

To-Do:
- Determine what features are the most important
- Project timeline
- Task list
